SUMMARY

Graduated top of the class from Trakya University, Department of Computer Technologies and Information Systems. Since university, I have consistently focused on improving my skills in frontend development through hands-on projects and continuous learning. I specialize in building modern, high-performance web applications using technologies like React, Next.js, and Redux. I value clean, maintainable code and enjoy creating user-centric interfaces with attention to detail and scalability.

WORK EXPERIENCE

Database Intern, OPTIIM   March 2019 - May 2019

- A 40-day summer internship I did related to the department I studied at High school.
- I have been working on the database at the junior level in this department.

Frontend Developer Intern, Saha Robotik   March 2023 - June 2023

- I developed and supported projects with React, one of the popular frontend frameworks.
- I played a role in the development and organization of actively used projects.

Frontend Developer Intern, Jotform   July 2023 - September 2023

- During my internship, I learned to use Ubuntu and WSL effectively in connecting to projects and actively utilized this skill throughout the internship.
- I demonstrated my proficiency in React by actively contributing to various projects, including larger-scale applications, and honing my frontend development expertise.
- By actively using artificial intelligence features in my projects, I have demonstrated my ability to integrate the power of artificial intelligence into real-world applications and encouraged innovation in my projects.

Frontend Developer, Difo Finance   September 2024 - April 2025

- I ensured that the designs created by the UI / UX team were coded responsively as pixel perfect with all the details through Figma.
- Developed frontend architecture using React, Next.js, and TypeScript, with Tailwind CSS for styling and Zod for robust form validation.
- I used Redux for complex state structures within the app and focused on performance, readability and sustainability goals throughout the project.
- I improved the structure and professionalism of frontend-backend integration by organizing API services and data models in a clean, modular architecture, which enhanced maintainability and scalability.
- I undertook the maintenance and update processes of existing projects, improving the user experience with regular tests and bug checks.
- I actively worked on Git and managed code versioning, branch management and deployment to live server.

ADDITIONAL INFORMATION

- **Technical Skills:** HTML, CSS (SCSS, Tailwind, Bootstrap, MaterialUI, Reactstrap), Javascript, Typescript, React, Next.js, Redux, Angular, Vue, Figma
- **Languages:** English, Turkish

EDUCATION

Kıraç IMKB Vocational And Technical Anatolian High School   **2016 - 2020**
Chapter Two, Database Programming
- Section 2.at Graduation
- Projects about C#, SQL, other.

Trakya University   **2020 - 2024**
Computer Technologies And Information Systems
- I graduated from the department with a first degree.
- During my university years, I realized many projects, mostly Frontend projects, and improved myself.
